

**In-Tank Check Valve
Model: CTD-Series**

Max Operating Pressure: 500 psig

Operating Temperature Range: -65° to 450°F

Available Flow Capacities: 15 to 60 SCFM

Available Inlet Connection Sizes: 3/8" to 3/4" (-6 to -12)

Inlet Connection Type: Compression Tube

Available Outlet Connection Sizes: 3/8" to 1" (-6 to -16)

Outlet Connection Type: Male NPT

Materials of Construction:

Body: Brass

Valve Housing: Brass or Plated Steel

Seal: Reinforced PTFE

Spring: 302 Stainless Steel

				1/4" NPT	P2						

Options

- Inlet Connection Size: The available sizes are 3/8" to 3/4".
- Outlet Connection Size: The available sizes are 3/8" to 1".
 - Note: Not all inlet/outlet size combinations are available. Call or email to check for availability.
- Additional Side Port
 - 1/8" – Additional 1/8" female NPT side port 180° from existing port.
 - 1/4" – Additional 1/4" female NPT side port 180° from existing port.
- Plating Option
 - None
 - Nickel Plated – Electroless Nickel Plated Brass
- Plugged Side Ports
 - Not Plugged – Side ports are not plugged.
 - Plugged – Side ports are plugged with removable threaded plated steel plugs.
- Thread Sealant
 - White colored thread sealant
 - Rust colored thread sealant

Examples:

- A CTD check valve with a 1/2" tube inlet connection and 3/4" NPT outlet connection with the side port plugged is **CTD1234-PLUG**.
- A CTD nickel plated check valve with 3/4" tube inlet connection and 1/2" NPT outlet connection with an additional 1/4" NPT side port is **CTD3412-P2-NP**.
